

Sartrex Trinet Software

Sample Screen Display

Sartrex Trinet software allows for data logging of 1 to 8 separate Tritium-In-Air monitors

Data is logged to an MS Access compatible database

Database supports over 1 Gbyte of recorded data (over 6 months depending on sample rate)

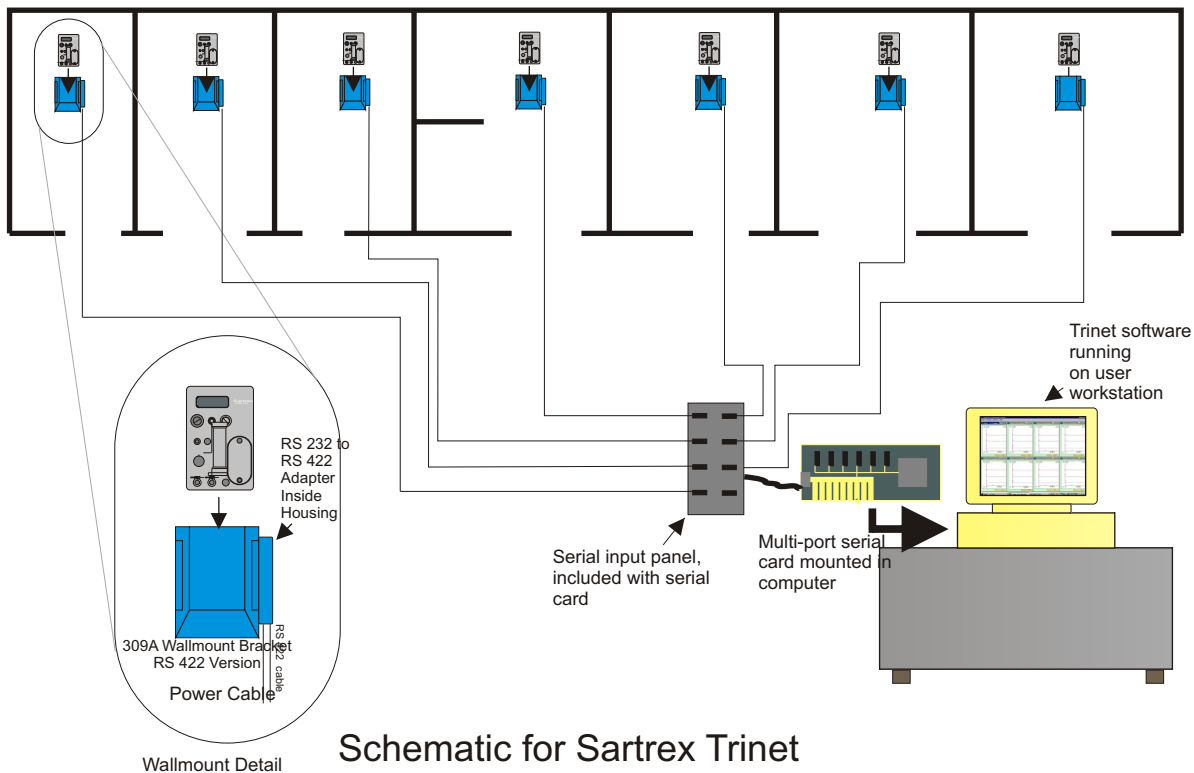

Replace large expensive multi-room monitor piped networks for many applications

Requires PC running MS Windows95

If required, Sartrex can supply an 8 port serial card & adaptor to add to your PC
